-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 1-18 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1,4,7,10,13 and 16 is/are rejected.
- 7) ☒ Claim(s) 2,3,5,6,8,9,11,12,14,15,17 and 18 is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on \_\_\_\_ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

## Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

## Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) \_\_\_\_.
- 4) ☐ Interview Summary (PTO-413) Paper No(s). \_\_\_\_.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_.

### **DETAILED ACTION**

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 7 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Son et al. (US 6,278,887).

Regarding claim 1, Son teaches a method for conserving power in operation of a radiotelephone, the method comprising: determining an ambient light intensity, referred to as an "ALI", at a radiotelephone and comparing the ALI value with a reference value ALI(ref) (see light sensed by a photo sensor is above or below a particular threshold, col. 7, lines 7-11); when the ALI value is at least as large as the ALI(ref) value, causing a backlight associated with the radiotelephone to enter a sleep mode (col. 7, lines 1-2); when the ALI value is less than the ALI(ref) value: determining if at least one function in a selected group of radiotelephone functions is presently in use (col. 7, lines 46-50, keystroke is entered); when no function from the selected group is presently in use, causing the backlight to enter the sleep mode (col. 7, lines 49-50, turnoff) ; when at least one function from the selected group is presently in use, turning on the backlight to a selected energy level and beginning to accumulate time under a selected timeout interval (col. 7, lines 53-55, time intervals); determining if at least one function from the selected group is still presently in use when at least one function

from the selected group is still presently in use, resetting the beginning of the timeout interval (col. 7, lines 17-20); when no function from the selected group is presently in use, continuing to accumulate time under the timeout interval, and determining if the timeout interval is completed; and when the timeout interval is completed, causing the backlight to enter the sleep mode (col. 7, lines 45-50).

Regarding claim 7, the claim is interpreted and rejected for the same reason as set forth in claim 1.

Regarding claim 13, Son teaches a method for conserving power in operation of a radiotelephone, the method comprising: determining an ambient light intensity, referred to as an "ALI", at a radiotelephone and comparing the ALI value with a reference value ALI(ref) (see light sensed by a photo sensor is above or below a particular threshold, col. 7, lines 7-11); causing a backlight associated with the radiotelephone to enter a sleep mode when at least one of the following two conditions is present: (i) the ALI value is at least as large as the ALI(ref) value (col. 7, lines 1-2) and (ii) no function from a selected group of radiotelephone functions is activated within a selected timeout interval having a detected timeout length (col. 7, lines 49-50, turnoff); and when at least one function from the selected group is presently activated, turning on the backlight to a selected energy level, beginning to accumulate time, and comparing the accumulated time with the timeout value (col. 7, lines 53-55, time intervals).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4, 10 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Son et al. in view of Morishima (US 5,570,421).

Art Unit: 2682

Regarding claims 4, 10 and 16, Son fails to teach providing an adjustment to a user-specified value of said reference value ALI(ref). In analogous art, Morishima teaches that the reference or threshold value used for controlling luminance of the LED can be set with two thresholds (col. 3, lines 63-65). It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the teaching of Morishima to the radiotelephone of Son in order to allow the user with different levels of light detection according to his visual detection.

*Allowable Subject Matter*

5. Claims 2-3, 5-6, 8-9, 11-12, 14-15 and 17-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Regarding claims 2-3, 8-9 and 14-15, the prior art of record fails to teach choosing the selected energy level as claimed.

Regarding claims 5, 11, 17, the prior art of record fails to teach the step of providing as claimed.

Regarding claims 6, 12, 18, the prior art of record fails to teach the step of providing as claimed.

*Conclusion*

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 2002/0142808 publication date 10/3/2002 teaches display keypad backlight management for portable electronics devices (see entire document).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LEE NGUYEN whose telephone number is (703)-308-5249. The examiner can normally be reached on 8:00 AM - 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, VIVIAN CHIN can be reached on (703) 308-6739. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9314 for regular communications and (703) 872-9314 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-4700.
